

OUR MISSION

In full partnership with active-duty colleagues of the Naval Security Group Command (NSGC), we exploit, protect, defend and attack information and information systems in Naval, Joint, and combined operations of the United States cryptologic system. *Simply put, our missions have worldwide impact!*

OUR PEOPLE

CTs are a select group of Sailors with uncommon skills and a unique sense of duty. Every member of Naval Reserve Security Group Command (NRSGC) is an active contributor to missions that support customers around the world. The tougher the task, the more a CT delivers.

If you're up for a real challenge, check us out at www.nrsg.navy.mil

WHAT MAKES US STRONG

Technical expertise, integrity and commitment are the hallmarks of a CT. We represent hundreds of skill sets and civilian professions -- all driven to succeed.

Review our skills profiles to determine how and where you best fit in.

OUR RESPONSIBILITY

Our role is to keep pace with the unprecedented changes in communications technology worldwide. To provide support to the warfighter, technologic innovation and professional training required by our customers, we must place the right Sailor, with the right skills, in the right place, at the right time. When we come together as a team, it's with a single purpose and a common objective...

National Security through Information Superiority.

OUR KEY CUSTOMERS

- COMNAVSECGRU & NSG Commands
- Joint Military Service Commands
- National & Worldwide Agencies
- Navy Fleet Commands
- School Commands
- Training Facilities

NAVAL RESERVE

S T A Y S T R O N G

"Defense Information Operations is a mission made for the Reserves, broadening our Information Assurance/Monitoring efforts to additional communications media is something we need to focus on in the short term. Just having the right skills in the inventory isn't enough, we need to deploy people with the right skills, when and where they are needed. The recent mobilization where our Sailors were immediately supporting the Global War on Terrorism is an outstanding example of deploying the right people, with the right skills, at the right time."

RADM J.D. Burns
Commander,
Naval Security Group Command

"While continuing to develop our partnership with NSGC, we will focus our efforts on building skills to enhance Information Operations and actionable intelligence within our claimancy and throughout the Naval Reserve force. Using the virtual workspace, we will take the mission to the sailor to enhance productivity and quality of service."
